1844-1851

102-122 E. Hamburg St./900-904 Compton St. (North side Hamburg; West side Compton)
Baltimore, Md.
Private access

A short (102-104 E. Hamburg St.) and long row (106-122 E. Hamburg St.) of two story plus attic, two bay wide brick houses with gable roofs mark this side of Hamburg St. All of the houses were built by John S. Gittings as part of his development of the southern section of this block and are quite similar to the same type of houses built by Gittings along Hamburg and Wheeling Streets to the west of Light St. 900-904 Compton St. are a row of two story plus attic, two bay wide brick houses with gable roofs built by Francis Kines, who also built a row of similar houses at 905-909 Light St., just to the west of these houses. Many of the houses on this block of Hamburg St. have recently been renovated.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This pair of two story plus attic brick houses with gable roofs were built in the 1840's as part of the development of this side of Hamburg St. They are identical to the neighboring row, 106-122 Hamburg St.

The houses are two and a half stories in height, 13' wide, and occupy lots 54' deep. The houses are two rooms deep and have two story high, two bay deep rear additions. The houses are constructed in common bond. The low-pitched gable roof has a continuous two-tier brick cornice extending across the facade. The houses have paired, centrally located double chimneys on both their front and rear gables. Each also has a hooded rear end chimney located at the north end of the kitchen addition.

All of the door and window openings have flat wood lintels and brick header sills. At 102 Hamburg all of the window openings are filled with 1/1 sash; at 104 Hamburg the first and second story openings are filled with new 6/6 sash and the attic story openings are filled with new 3/3 sash. 102 Hamburg has a modern flush door set beneath a single light transom; 104 Hamburg has a modern six panel door set beneath a new three-light transom. The houses sit on fairly low basements, the entrances being reached by three (at 102) and two (at 104) stone steps. Each house has a narrow, rectangular coal opening located beneath the first floor window.
